### Message By President

**Dr. V. D. Bhosale (President)**

The Institute was founded in 1996 with a clear vision and purpose. It was envisioned that in the foreseeable future it would evolve into a world class educational institute recognized for its commitment to high powered quality education. We also committed ourselves to developing outstanding professionals and entrepreneurs who exemplify humanistic values, are socially responsible stewards and create and disseminate practitioner oriented knowledge that will uplift society. The current global economic slowdown is driving India Inc. to rethink strategy, reassess agendas and revisit several of the long-standing rules of the game. Leadership is being stretched for direction and results; management is being tested for fortitude and having a balanced head-on shoulders approach to keep the momentum going. As the business world gets more complex educational institutes will need to provide new skill sets, innovative ideas and a heightened mental toughness to sail through the current corporate turbulence. In order to keep pace with the velocity of change and thrive in an uncertain environment our institute has already shifted gears to a mode of mastering change. It has launched several Strategic initiatives both at the macro and micro levels to ensure that student's overall development is in tune with the present demands and expectations of industry. Our strategic focus in future will address areas of curriculum design, mentoring and developing soft skills. These initiatives will help student to develop competencies in dealing with global complexity, emerging technologies and change, social and cultural diversity.
